

Medical Emergencies Course for Dental Practices

This FREE of charge; half day multi professional training course will help all staff members within your practice manage those rare medical emergencies that you hope will never happen.

Using the high fidelity adult manikin, realistic scenarios can be recreated in the dental chair or elsewhere in the practice. The course not only looks at the immediate medical management of the patient but also addresses teamwork, organisation and communication, which would lead to either the situation going very well or a disaster.

**Minimum numbers apply for courses held external to the Montagu Clinical Simulation Centre, (S64 0AZ)*

To book a course for your practice...

Please contact 01709 649106 or e-mail clinical.simulation@dbh.nhs.uk

We have a three-year programme of courses featuring different emergencies on each course. We recommend that these are booked in on an annual basis.
