

Dental Skills and Emergencies

This one day multi professional training course will help all staff within your practice manage those rare medical emergencies that you hope will never happen.

This one day course runs in your practice setting, fulfilling the General Dental Council requirements for practices to undertake annual updates of Basic Life Support (BLS) and medical emergency scenarios with the delivery of essential clinical skills training, for example, how to monitor a sick patient, blood glucose and oxygen saturation monitoring.

The BLS update includes Resuscitation Council Certification.

There is a charge for this course, please contact us for prices.

To enquire about prices or to book a course for your practice...

Please contact 01709 649106 or e-mail clinical.simulation@dbh.nhs.uk

**Minimum numbers apply for courses held external to the Montagu Clinical Simulation Centre, (S64 0AZ)*
