

Human Factors for HCAs in Paediatrics – Part 2

Are you ready for the next adventure?

The Human Factors for HCAs in Paediatrics – Part 2 has been developed for teams of Health Care Assistants involved in caring for children after participating in the The Human Factors for HCAs in Paediatrics (Paediatric HCA CARMA 1) course. The course runs over a full day and is free to all Health Care Assistants employed by the NHS throughout the Yorkshire and Humber region.

Using high fidelity manikins and simulation based-education the course aims to develop confidence and competence in recognising and assessing potentially sick patients, develop crisis management skills, communication and teamwork skills within the multidisciplinary team.

Supports KSF outlines: Core Dimensions 1-6, HWB 1-2 + 4-7

To book a course for your team please contact:
