

# Human Factors for Theatre Teams

In-situ training for theatre teams...

These are ½ day courses run in the theatre setting, generally on Theatre Audit days. The course allows the multi-disciplinary team to practice the management of medical emergencies within a safe, non-threatening environment.

It allows the exploration of human factors such as:

- situational awareness
- fixation
- leadership
- communication
- team working.

**Montagu Clinical Simulation Centre is pleased to offer opportunities for theatre teams to practice the management of crisis scenarios in their own unit using a mobile high fidelity adult manikin.**

**To book a course for your team please contact:**
